

# 6100

## Coin and Banknote Counter

Count your cash drawer in 2 minutes

- Counts both coins and banknotes
- Three standard currencies: EURO / Pound Sterling / Swiss Franc
- Software available for other currencies

There are coin counters. There are banknote counters. And then there is the Safescan 6100 – a superior all-round machine that will literally go through your till in a few minutes! Where most money counters are rather noisy, the Safescan 6100 proves that cashing up doesn't have to scare off the customers! From the smallest denomination Euro coin to the largest banknote; the handy user interface will ask for coin and banknote types in the right order. The device will also add up the amounts accurately and quickly. The total amount, the numbers and the amount per coin and banknote type can be read on the illuminated LCD screen right away. So whether you have one or tens of cash registers; the Safescan 6100 will save you a lot of time. Day after day!
